

# LOGICA VISUAL SOFTWARE

Logica Visual Software Logo

Use Logica Visual Software for managing one or more centralised testing systems from the Hostwave range. Including Logica and Logica FM self-contained systems, and central battery system ALOG.

Building layouts can be imported in DWG format enabling the location of each luminaire to be easily identified. The visual interface lets users directly operate the devices and view their status.

Configuration, programming and error reports can be printed and stored, luminaires can be monitored and controlled individually, and tests can be programmed, activated and stopped.

Platform/Operating System: PC/Windows only.

Product category: Central Testing Equipment
