

# 1418 LED

Recessed fixture for mounting in an exposed structure, slats and plasterboard. Also for ceiling mounting with an adaptor. Characterized by excellent Dark Light anti-glare control, its use is particularly good in workplaces with video terminals where employees are exposed to artificial light for long periods. The exact emission of light on the work surface gives precision to the beam of light, the indirect emission that is reflected on the side reflectors considerably increases the comfort thanks to the overall result of soft light. Additional accessories are available for integrating emergency lighting, the LED Inverter for lighting up part of the fixture in the event of a black-out, or the LED for inserting in the seat provided.

Product category: Luminaires, Recessed, Surface
